

AKDO®

BESPOKE WOOD

Far Beyond the Surface

AKDO®

AKDO is a company built on a foundation of love, family and dedication. Thirty years ago, our CEO, Hakki Akbulak was looking for a way to stay connected with his brother, who, at the time, was an ocean apart in Turkey. The pair decided that by founding a business together, they would remain connected in every aspect of their lives on a daily basis.

As a result, AKDO was born, and today is comprised of multiple factories, ateliers, and a vast distribution network in luxury markets. The AKDO family is much larger than it once was, and includes a group of passionate and caring employees, suppliers, dealers, consultants and customers.

THE LOOK YOU WANT, FOR THE PRICE YOU NEED

AKDO can customize any of its wood products to match the customer's budget, style and needs. From material, color, width, length, finish and pattern, the possibilities for customization are endless.

MATERIAL

Our wood products are available in various materials from European White Oak, American Walnut and Canadian Maple to exotic wood species from South America and Africa. All of our wood products are sustainably harvested with FSC certification available upon request. For high traffic areas, Eucalyptus is an extremely durable, moisture resistant, and affordable option.

PATTERN

Create a pattern with your hardwood flooring to add a visual interest and texture. Classic patterns such as plank, chevron, parquet and herringbone create an attention-grabbing element in a space. For a more personalized approach, bring us your own pattern and we will bring your vision to life.

FINISH & COLOR

AKDO provides an unlimited assortment of wood color options, matching any colorway you can imagine. Different stain shades, colors and opacities are available to enhance the natural color and characteristics of the wood, creating a one of a kind masterpiece. Finish options are available in a variety of levels from smooth, textured and natural. Choose from:

Smooth (Glossy): Multiple coats of Polyurethane are applied to the surface of the wood to create a glossy finish as well as everlasting durability.

Textured (Brushed): Maintains the texture of natural wood.

Natural (Matte): A natural oil finish is applied to the wood and put into a machine to seal the surface, offering greater protection which offers durability against stains and scratches.

TEXTURE

The way the wood is cut determines the movement and amount of veining and graining displayed. Quarter sawn provides a more unique, contemporary, and linear grain pattern for a cleaner look. Plain sawn wood showcases the natural grain of the wood, making it more traditional and less expensive. Choose from:

Select: No knots or fillers are on the wood for a clean, modern look.

Natural: Occasional knots and fillers for a mix of modern and traditional.

Rustic: Knots and fillers are displayed throughout the wood providing a more rustic and traditional aesthetic.

SIZE – LENGTH & WIDTH

Work with us to create the optimal sizes for your project by customizing the width, length, plank thickness and top layer thickness. Whether you desire the uniform look of a single-width plank or the aesthetic of a floor with randomly sized planks, the choice is yours.
