	FIREPLACE SURROUND	INTERIOR	TRAFFIC				
	Yes – Heat Not to Exceed 1472°F	Yes	—				

TECHNICAL DATA

FEATURES	SPECIFICATION
DCOF	Due to the natural characteristics and variation in natural stone, slip resistance will vary. Such factors are dependent on lots, finish and the topical sealant applied. There is currently no standard industry test with the ability to measure the exact slip resistance.
	In order to reduce the slipperiness of stone surfaces, AKDO suggests selecting a Non-Polished finish such as Honed, Sandblasted, or Textured stone, or choosing a mosaic, as the grout joints in the stone result in an increase of friction.

Due to the inherent characteristics of natural stone, there may be variations in color, movement and texture from lot to lot.
For detailed installation guidelines, visit akdo.com.
