Gensler is a global architecture, design, and planning firm with 49 locations and more than 6,000 professionals networked across Asia, Europe, Australia, the Middle East, and the Americas. Founded in 1965, the firm serves more than 3,300 active clients in virtually every industry. Gensler designers strive to make the places people live, work, and play more inspiring, more resilient, and more impactful. As product designers, the firm draws on its vast knowledge of new materials, the latest technologies, and evolving workplace trends to enhance visual appeal, performance, and end user experience.

Due to the inherent characteristics of porcelain, there may be variations in color, movement and texture from lot to lot. For detailed installation guidelines, visit akdo.com. Porcelain tile is defined by ANSI A137.1 as an impervious tile with a water absorption of 0.5% or less as measured by the ASTM C373 test method. There are, however, many instances in which tile not meeting this standard is advertised and sold as porcelain tile. Marketplace confusion, installation problems and even liability concerns can result when non-porcelain tile is misrepresented in the marketplace.
